

ARE YOU STARTING A MEDICAL PRACTICE?

Feel Free to Print this Sheet Out to Help with Your Office Planning :)

HERE IS WHAT YOU NEED!

Sample Layout of General Medical Practice

Tips and Other Information

- Most of the items that we do not carry (Desks, Cabinets, Shelving, Sinks, etc.) are most easily found and most cost-effective at your local Lowes or Home Depot
- Most Doctors or Startup Owners tend to get at least one Power Exam Table or Power Procedure Chair per office to help facilitate larger or less mobile clients, this also helps the efficiency and effectiveness of procedures
- Every Medical Office Must have an AED on site
- Finding a Local Biomed Tech is important as you will have to have your items certified and tested once every year
- When purchasing equipment it is best to go ahead and find the user manual online and download it to your computer, so down the road you can troubleshoot it if need be

Here is What You Need Below

- **Waiting Room**
 - Waiting room chairs
 - Books/Magazines, End/Corner Tables, Lamps
- **Front Desk**
